The Tennessee State Data Center is proud to host an Economic Census Workshop for data users. Conferences are planned for both Nashville and Knoxville. We invite you to join us at either location for an intensive look at the data being released this summer by the US Census Bureau. Chuck Brady and Paul Zeisset of the Census Bureau’s Economic Planning and Coordination Division will present a slide/lecture presentation. Wireless internet is available for users to access data in real time during the conference for those wishing to bring a laptop. Refreshments will be provided.

AGENDA INCLUDES:
- Background on the Economic Census: Basic Concepts and Uses of the Data
  - Scope of the Census; how data were collected; how businesses use the data; how government agencies use the data
- North American Industry Classification System and Census Geography
  - Introduction to the NAICS system and how it changed for 2007
- 2002 Economic Census Products
  - Redesigning census products for the information age; types of reports; release schedules
- Working with Economic Census Data in American FactFinder
  - Accessing data in American FactFinder; comparability issues in assembling time series data; reference materials
- More Frequent Business Data from the Census Bureau
  - County Business Patterns; Statistics of U.S. Businesses; Annual Survey of Manufactures; and more
